

Science – Grant Application – 2026

The application form consists of six (6) tabs, including several mandatory questions. Please complete and review each tab carefully.

The application form includes for basic information about the applicant (i.e. name, academic degree or title, contact information, dissertation title, and date of doctoral defense), as well as information about the work for which the applicant is applying for a grant (including the field of the application, field for statistical purposes, purpose of the grant, duration of the work, amount of the working grant, and possible expense share).

In addition, the required attachments must be submitted through the application system. On the *Other Funding tab*, applicants must report grants they have received during the past three years, as well as any other applications currently under consideration.

In addition, the following fields and questions are included in the application form:

Summary of the plan and objectives -tab

Which career path are you aiming for?

Select the primary objective.

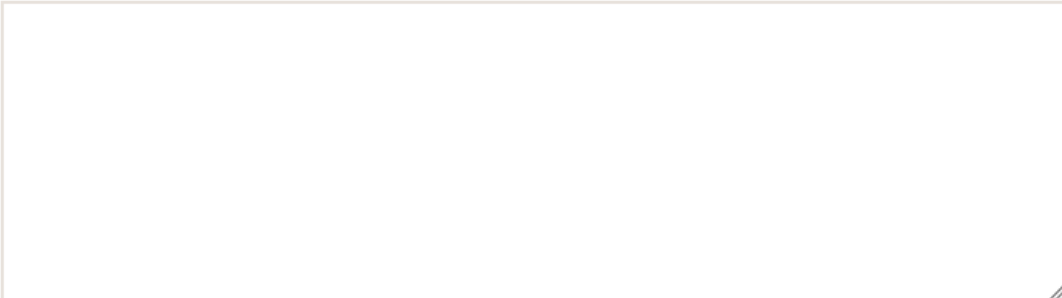

Choose

- Choose
- Paid employment/public service employment
- Research career or other academic career path
- Entrepreneurship / innovations
- Other career path, please specify

What kind of scientific, societal, educational, or commercial development potential and impact do you believe your work will have?

The purpose of the grant is to support the emergence of new ideas and perspectives and to facilitate the researcher's successful transition toward their intended career path. Please describe the developmental potential of your proposed work.

You may, for example, discuss the kinds of new ideas, perspectives, expertise, or solutions your work may generate; the opportunities for further development or applications that may arise from it; or how your work may open up new directions in research, your career trajectory, or other professional activities.

3000 characters left.

Summary of the plan and objectives of the work

The purpose of the grant is to support a recently graduated PhD in transitioning toward their own career path and working life, as well as to enable further development and deepening of the results of their doctoral research.

- Describe what kind of outcome you would consider successful at the end of the grant period: Where do you hope to be both professionally and in terms of research by the end of the period? How will the work carried out during the grant period contribute to these goals?
- Also explain how you plan to achieve these goals. For example, you may plan collaboration with companies or research groups, continue your research in the form of a new project, or develop your own activities with the support of, for instance, an innovation incubator.
- In addition, prepare a project schedule. Present a clear and realistic plan for the different phases of work during the grant period and their timeline. The schedule may highlight key objectives, forms of collaboration, publications, pilot projects, or other concrete steps forward.
- A more detailed and comprehensive plan should be provided in the work plan attachment.

On the Attachments tab, you can upload the required supporting documents to your application as PDF files. In addition, once you have submitted your application, you can send a reminder regarding the statement request to your referee.

Attachments

Attach the required attachments to your application. The application cannot be submitted unless all mandatory attachments related to your application are included.

Application attachments

- **Curriculum vitae (mandatory)**. It is recommended to use the researcher CV template provided by the Finnish National Board on Research Integrity (TENK).
- **Work plan (mandatory)**. The document should be no longer than five (5) pages.
- **Publication list (mandatory)**
- **Doctoral degree certificate or permission to defend (mandatory)**
- **Statement** from a research group leader or partner, for example (not mandatory). The statement provider will submit the statement to the Foundation's statement service.
- **Opponents statement (optional)**. Recently defended applicants may include the opponent's statement.

Email reminder to the referee

A statement for a scientific grant application is a voluntary attachment provided by the referee upon the applicant's request. The referee can be, for example, the head of the research group or a collaboration partner. Please contact your referee personally, provide instructions for the statement, and ask them to submit the statement through the foundation's statement system. Do not rely solely on this email reminder for requesting the statement.

Referee's email address

Naming Attachments and File Format

- Name the attachments clearly and descriptively.
- If you have trouble adding attachments on a Mac computer, try naming the attachments without special characters or Scandinavian letters å, ä, ö.
- Attachments cannot be sent by email or mail, nor can they be delivered to the office. Attachments cannot be submitted afterwards.
- Attachment files can only be of type .pdf
- The maximum file size is 3MB.

Add a New Attachment

1. Click "Browse".
2. Select the desired file.
3. Press the framed button "Add attachment".
4. After adding the attachment, select the attachment type from the menu above the attachment.
5. **Make sure your application includes all mandatory attachments and that the attachment type describing the attachment is selected from the menu. The application will not be submitted if a required attachment type is missing.**
6. Remember to save after adding all the attachments you want.
